Please **ADD** new claims **57 - 58** as follows:

57. An apparatus for facilitating selling an aging food product, comprising:

a storage device; and

a processor connected to the storage device,

the storage device for storing a program for controlling the processor; and

the processor operative with the program to:

receive a round-up amount from a POS terminal;

determine an aging food product having a minimum price that is not greater than the round-up amount; and

transmit an indication of the food product to the POS terminal.

58. A computer readable medium encoded with processing instructions to direct a device to perform a method for facilitating selling an aging food product, the method comprising the steps of

receiving a round-up amount from a POS terminal;

determining an aging food product having a minimum price that is not greater than the round-up amount; and

transmitting an indication of the food product to the POS terminal.
